Pulse Recovery

Finally, there is a way you can charge and recover dead lead-acid batteries that up until now were thought to be beyond saving. Presenting new XCR-20, the most effective battery charger and recovery product available on the market today.

State-of-the-art charging and recovery system (up to 20 amps) works with 12-volt conventional flooded, maintenance free, AGM and gel cell batteries. Uses either 110- or 220-volt ac power so it can be used anywhere in the world.

Our revolutionary, Pulse Technology safely removes and prevents the buildup of damaging lead-sulfate deposits on the battery plates so batteries can accept, store and release maximum power.
