## Battery Testers

Part Number	Description
<p><b>741X475</b> 475</p> 	<p> <b>475 Digital Battery Analyzer</b> The 475 uses a simple two-step testing method with self-prompting instructions. It will even tell you if a battery needs to be conditioned with a PulseTech ReNew-IT Pulse Technology product to remove sulfation buildup rather than be replaced.</p>
<p><b>741X490</b> 490PT</p> 	<p> <b>490PT Digital Battery Conductance Analyzer</b> The new standard of battery diagnostics. Used to test 6- and 12-volt automotive, marine and commercial batteries from 100 to 1700 CCA.</p>
<p><b>741X510</b> 510PT</p> 	<p> <b>510PT Battery/Starting/Charging System Analyzer</b> This hand-held diagnostic tool tests 6- and 12-volt automotive, commercial and marine batteries as well as 12- and 24-V charging systems from 100-1700 CCA.</p>
<p><b>741X205</b> MCR-700</p> 	<p> <b>Micro700 Heavy-Duty Electrical System Analyzer</b> Allows fleet service technicians to quickly and efficiently test multiple batteries, battery packs (in parallel, series or series-parallel configurations) and electrical systems.</p>
<p><b>741X800</b> MBT-1</p> 	<p> <b>MBT-1 Micro-Ohm Load Tester</b> Checking for good and bad batteries is quick and easy with this easy-to-use micro-ohm load tester. It's so small you can put it on a key ring or slip it in your pocket.</p>
